

REPORT GENERATION AND ENERGY ANALYTICAL SERVICES

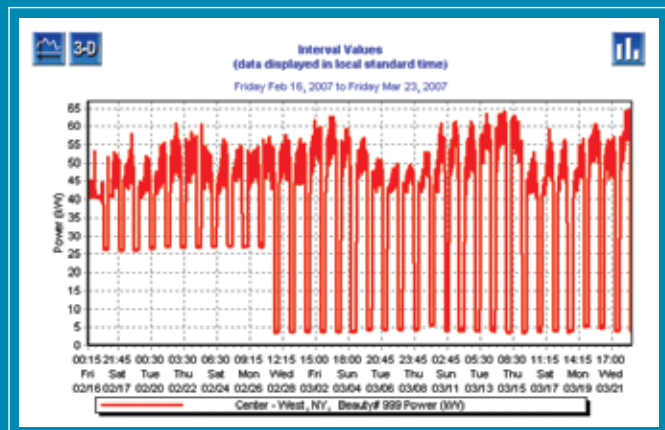

USE YOUR ENERGY WISELY.

Monitoring and recording interval energy data is only half the job of making informed energy management decisions. The other half involves using the information gathered to identify abnormal events, trends and anomalies that require the attention of energy professionals.

We've developed a suite of energy analysis and diagnostic programs that identify important energy consumption details and use this information to pinpoint areas of concern. Our energy analysts are professional engineers and certified energy managers who have a broad spectrum of experience in helping you use your energy wisely.

We will work closely with you from the start to understand your organization's unique operations, gather and analyze data, and develop a cohesive view of your energy use. Our background allows us to sort through volumes of information and find the pertinent data that will help you reduce your energy costs and contribute to your bottom line. The information we collect is translated into a detailed analysis that becomes your guide for energy management strategy. We make specific recommendations and build operational strategies based on your energy usage patterns and we work with you to implement our recommendations.

ABOUT ENERWISE

Enerwise Global Technologies, established in 1980, is a leader in demand response, energy infrastructure management and renewable energy services for commercial, institutional and industrial customers. We enable customers to reduce energy costs, comply with increasingly demanding environmental regulations, take advantage of alternative power initiatives, increase operational security and improve reliability. We deliver responsive, well-tested energy solutions, ranging from remote power monitoring and control systems to energy history analysis and real-time demand-response solutions.

Our systems and staff work around the clock to make sure you're always running smoothly and efficiently. Other companies depend on us to solve their energy problems; let us help you with yours.

For more information, log on to our Web site at www.enerwise.com, call 800.307.3395 or e-mail sales@enerwise.com.

REPORT GENERATION AND ENERGY ANALYTICAL SERVICES

Report Generation and Energy Analytical Summary

- Broad-based energy management expertise
- Insight into energy issues and operational effects
- Actionable recommendations and strategies
- Deployment assistance and knowledge transfer

Report Generation Services

Our energy analysts provide monthly reporting that identifies top energy reduction opportunities for facilities. Reports are structured to separate facilities by weather region and, optionally, by facility type, brand or other unique characteristic.

Monthly Deliverables

- Identification of top opportunities, including potential savings and recommended actions
- Review of opportunities identified to date
- Detailed analysis of the most significant opportunities
- Performance indicators report for all facilities

Turnkey Engineering Services

Our energy analysts provide end-to-end support of your energy management needs. From data collection and monitoring to implementation of strategies and reconciliation of results, our energy analysts help minimize your energy expenditures.

- Monitoring and alarm notification 24/7
- Exception detection and evaluation
- Recommended actions
- Strategy development
- Deployment assistance
- Results reconciliation

Company Name	Store Number	State	Square Footage	Annual Projected Energy Savings	Annual Projected Energy Budget Savings
Store Model A	163	MI	8363	145,385	\$9,450
